Fires highlighted in yellow have submitted a final ICS-209

[illegible]

Evening Brief

Date: Wednesday September 13, 2017

Weather Summary

Scattered showers and thunderstorms will affect most areas of the Great Basin on Thursday. Humidity will be elevated in all locations, with some areas seeing significant wetting rains.

Southwesterly winds will increase across the southern half of the area Thursday ahead of an approaching storm system from the northwest. This storm will push a cold front across the Great Basin...from Idaho then eventually thru Nevada, Utah and Wyoming Thursday afternoon, bringing much cooler temperatures and periods of moderate to heavy rain showers. The cold front will advance into northern/central Utah, southeast Idaho, and western Wyoming on Friday. Snow is possible above about 9,000 feet across portions of Idaho and northern Utah.

A drying trend is expected this weekend, but another strong and even colder storm is expected Sunday into early next week, dropping temperatures to nearly 20 degrees below normal and bringing additional wetting rains, high elevation snowfall and gusty winds.

Preparedness Levels

Great Basin	3
National	5

Great Basin Fire Activity (from Irwin): Light Activity

New Fires and Acres: 17 fires for 955.8 acres; 1,121 acres large fire growth; 3 new large fire

Resources:

- Crews: 7 T1 IHCs in GB: 2 Committed, 3 R&R and 2 Unavailable.
 - GBCC has committed an estimated 35+ Type 3, 4, 6 engines.
 - 2-T1 and 4-T2 helicopters are available in GACC.
-

Great Basin Fire Potential Summary

Moisture with thunderstorms and prolonged higher humidity over the past week has significantly moderated fuel conditions across the region, with still the driest fuels in the Central Idaho mountains. Significant precipitation will overspread the region during the next few days, which will cause fuels to moisten significantly. Even areas in far southern Nevada that may miss the brunt of the upcoming rains, have already received significant rainfall in the past few days and fuels there are quite moist.

There is no long term drying trend in the forecast. A brief drying this weekend will be replaced by an even stronger and colder storm system early next week.

We continue to have a Great Basin Fuels and Fire Behavior Advisory in effect for Nevada, Idaho and Utah, available at the following link:

https://www.predictiveservices.nifc.gov/fuels_fire-danger/GB_Fuels_and_Fire_Behavior_Advisory.pdf
